

FREEDOM

Re-engineered for added strength! New features include a vacuum-formed base, reinforced side panels, longer hand rails, moulded-in vent screens, plastic carrying handles, and a strengthened roof, door frame, closure and latch.

In impact tests, the floor and wall joints withstood a force twice as strong as previous designs without damage, and a bevelled exterior floor edge improves forklift access for easy moving. Other features are the plastic rust-free lift handles. The new roof is 50% stronger. Lastly, a new heavy-duty door closure provides added durability. When you add up all the new benefits and include our industry-leading limited 4-year warranty, the Freedom stands alone in quality and reliability.

Specifications

Dimensions (HxWxD): 2.29 m x 1.68 m x 2.22 m
Weight: 136 kg
Standard tank volume: 132 L

Colours
