Meeting New Expectations

There is a growing expectation for nicer restrooms at events and job sites, and yet it needs to be affordable for both the operator and those looking to rent. The Selfie Slim is ideal for meeting both these needs and offering users an exceptional restroom experience at a competitive price.

Users will find the bathrooms pleasantly lit with a full sink, mirror and large counter top to hold a drink, purse or other items. The hands-free, foot flush toilet is angled, creating ample room for guests to comfortably sit or stand.

Strength and Durability

One look at the Selfie Slim will convince you it can take abuse and retain its basic beauty. The heavy-duty, powder-coated chassis rides on two 1600 kg and 14 inch aluminum wheels.

For durability, the exterior and interior surfaces, including walls, roof and flooring are made with non-wood, seamless materials to prevent water and mildew from causing costly water damage and unwanted odour.

Guests will appreciate the well-lit mirror, sink and counter top when freshening up. For those who want to offer hot water, an optional water heater is available.

The hands-free, foot flush toilet is comfortable, simple to operate and with corner positioning, provides guests with ample room within the restroom.

Add Some Great Options

If you want to upgrade your Selfie Slim, we offer AC and solar power. Using solar power the Selfie Slim can operate all day without the aid of external power. Operating the AC requires an external power source. A Blue-tooth radio system is another great option to consider.

Additional Options

- ✓ Radio Package
- ✓ Water Heater
- ✓ Spare Tire
- ✓ Forced Air Heat
- ✓ Aluminum Wheel
- ✓ Gender Signs
